INTRODUCTION

Lithereum , A phenomenal Cryptocurrency project which has been an idea for a long time, finally took off when it's tokens were created and deployed on Blockchain on October 9TH 2020. Lithereum has gone on to witness great unexpected exponential growth making it one of the most promising projects in recent time, with a very massive and supportive community of almost 40,000 Members, backing Lithereum across Telegram, Twitter and Youtube.

BLOCKCHAIN

Blockchain, itself is a decentralized Ledger of all transactions across a peer-to-peer network. Using this technology, participants can confirm transactions without a need for a central clearing authority. The Blockchain is a simple yet indigenous way of passing information from A to B in a fully automated/Safe manner. One party to a transaction initiates the process by creating a block. This block is verified by thousands, perhaps millions of computers distributed around the net. The verified block is added to a chain, which is stored across the net, creating not just a unique record, but one with unique history. Falsifying a single record would mean falsifying the entire chain which is virtually impossible. Lithereum uses this model for monetary transactions, Making it secured as a decentralized cryptocurrency in the global cryptocurrency market

Lithereum is now built on the Tron TRC-20 blockchain, this super fast network would aid the exponential growth of Lithereum in the long run. The Tron TRC-20 BLOCKCHAIN is completely embedded in low transaction and swap fees which would help the Lithereum community in speed of transactions than any other blockchain, it would also aid a better lithereum Blockchain when the unique Lithereum blockchain ecosystem is developed. Contrary to popular opinion that coins on the Tron blockchain are usually cheap, due to the price of Tron, they are also very expensive high priced coins on tron TRC-20 blockchain trading across several Exchanges. Lithereum would be the digital gold on the Tron TRC-20 advanced blockchain and go on to trade even higher over time, with Lithereum already built in one of the fastest Low -Fees blockchain, the community could be assured of trading with lowest fees, and even more lower or no fees when the unique Lithereum blockchain ecosystem goes mainstream in Q1 of 2021.

LITHEREUM USECASE

Lithereum, the popular Yellow token just like major cryptocurrencies in the global market would be used as a means of facilitating real time instant low fees value transaction (Making and receiving payments), but still unlike Major Crypto currencies out there or just any TELEGRAM based project, Lithereum has its own special Use Case and features.

Lithereum whilst being used as a means of value transfer would also majorly be used as a means of payment online. This could range from free-lancing Jobs online to network Marketing and even online salaries. Lithereum would serve as an online payment gateway Between clients, customers and employees online, bringing about a global revolution In the world of digital payment. Online workers such as bloggers, free lancers, paid marketers or even content creators would not have to wait for days for their payments as Lithereum would completely solve the issue of delayed online payment services and bring about instant almost fee free transactions.

One unique aspect of Lithereum that would put lithereum on an exponential growth scale is it's use in gaming rewards. Yes you read that right, when it comes to Lithereum being used in gaming rewards, the development team has really put great efforts to make this possible, through promotion and partnerships, Lithereum being used in the gaming rewards industry would cut across advanced gaming apps on playstore and app store to standard gaming organizations.

Lithereum would be used in in-app gaming rewards where gamers earn Lithereum which can be Withdrawn and traded on Exchanges, or used as a means of payment to buy artifacts or machineries related to that particular gaming app. Plans is still ongoing for gamers to deposit Lithereum into gaming apps and used for in – app gaming purchases instead of the stress of fiat deposits, the future of Lithereum is really bright aided by its special use case functions.

ROADMAP CHART

-OCTOBER : TOKEN CREATION ON BLOCKCHAIN, AIRDROP 1 , PRESALE 1

- NOVEMBER : PROMOTIONS, AIRDROP 2, PRE-SALE 2

-DECEMBER : LISTING ON COIN RANKING, PRE-SALE 3 , BITXMI PROCEEDINGS

-JANUARY : PROMOTIONS, LISTING ON BITXMI, FINAL AIRDROP

NEAR FUTURE: MORE LISTINGS, GAMING /PAYMENT GATEWAY INTEGRATION, LITHEREUM BLOCKCHAIN DEVELOPMENT

GROWTH

In terms of growth, Lithereum has become one of the fastest growing token in the upcoming Cryptocurrency industry.

Since it's launch in early October, with a very small community of few hundred members, Lithereum community has grown to almost 40,000 members across Telegram, Twitter, and Youtube. The undiluted support of the Lithereum community has also been seen in the Pre-sale with almost 1Million Lithereum tokens already sold, Making it the one of the most pre sold out project in recent time. Lithereum token has also seen a pre sale price surge to 0.5\$/LTH in pre sale value, this has not dampened the morale of the community but even more Investors troop in daily as they see the massive potential of Lithereum. LITHEREUM has gone on to list on COINRANKING even before exchange listing a ground breaking achievement. A surge in Investors have also been seen in recent time, and a more expanded team of global cryptocurrency experts to push lithereum forward.

Statistically, Lithereum has outdone any other project and proved that this is not a regular Crypto project, but as boldly crested, A phenomenal Cryptocurrency Token built on blockchain Technology. Let's consider some lithereum statistics below

- A large community of almost 40,000 members
- Approximately 1Million tokens sold. The largest in Presale Volume and price of any TRC-20 Project'
- Double Airdrops distributed
- Stuck closely to roadmap, fulfilling as written out

POTENTIAL

As stated out in growth, the success of Lithereum project' has gone on an exponential level attracting Attention from all corners of the global Crypto currency industry , with one of the best Pre -Sale success of any Telegram based projects already belted , aided by a large supportive Community and a phenomenal Use Case, ground breaking possibilities it's all that awaits this massive token. Lithereum is already poised to be a digital Gold on Tron blockchain. One important potential of Lithereum is it's staking capabilities, The Lithereum Development team is already poised to Launch the Highest APR (ANNUAL PERCENTAGE RATE) ever compared to existing staking cryptocurrencies. The Lithereum staking would yeild an APR of 20, with the highest known APR being 11 percent, Lithereum is poised to double the profits of Investors through its Massive staking Capabilities that would in turn yield profits for

stakers, on this run the price of Lithereum is already poised to grow over time, towards 5-10\$, a possible 1000 percent profit for investors is achievable with Lithereum.

Lithereum would create a revolution in payment services online with employees and employers, for example a client and a free lancer, enjoying the best payment gateway online, which would in turn influence the rapid adoption of Lithereum leading to increase demand which will spike up the price of Lithereum and ensure more Exchange listing. Lithereum is also built on one Phenomenal use case barely exploited by other cryptocurrencies with only Bitcoin and a low percentage of Ethereum known in this regard. Lithereum Partnering with the gaming industry puts the project at another level entirely compared to other tokens. Popularly recognized as the yellow token by this industry, it would be for the most part, the third cryptocurrency to achieve this feat. The gaming industry is one of the largest industry by tech population, Lithereum being integrated into this community would bring about widespread adoption of Lithereum by not just any population, but the tech savvy users of the gaming industry, this would attract even more investors creating one of the highest known liquidity in the near future. Lithereum is bound for greatness, no doubt about this.

Another feature that will increase the potential of Lithereum being the digital gold in tron blockchain that cannot be overlooked is the development team behind this golden token, and the massive incoming promotion and partnerships already in the works by the team.

The Lithereum Development team consist of Crypto experts from all corners of the industry', with Crypto currency experts and Enthusiast from Asia, Netherlands, New Zealand, Australia and The Giants of Africa, coming together to create and push this great project, it's definitely heading to the top. The incoming massive promotion coming up for Lithereum across all social panels of the internet provided humans can be found in that Crypto space would really be Massive, the team already mapping out a high budget for this and even involving crypto currency Influencers across YouTube, Telegram, twitter, instagram, facebook and even whatsapp promotions, to publicise and increase awareness about Lithereum which would lead to rapid mass adoption of this phenomenal digital gold presently on tron Blockchain, NO DOUBTS, Lithereum is bound for greatness.
